ANURENJ SUDHEER

REACT NATIVE | REACT

anurenjatbusiness@gmail.com | 7356380659 | github | https://anurenj.vercel.app/

Mobile Engineer with 3 years of experience in React Native and ReactJS, delivering production-ready applications published on the Google Play Store and Apple App Store. Experienced across the full mobile development lifecycle, including UI development, REST API integration, state management, native integrations, third-party SDKs, performance optimization, and app store releases.

WORK EXPERIENCE

Links4Engg **2024 Aug - 2026 Sept**

Vehicle Tracking System (VTS) Trackolet— Transport Dept., Chhattisgarh

React Native (Android & iOS) · Maintenance & Enhancement

- Maintain and enhance a live government fleet-tracking app (71 screens, 187 APIs) for department staff, citizens and public bus-search users: Mappls live tracking (marker clustering, bearing-based icon rotation, WebSocket streaming), trail playback (Turf.js, polyline decoding, custom RouteSimulator engine with speed control), permission RBAC with create/read/edit/delete role editor, 11 report modules with Excel export (SheetJS + rn-fetch-blob) and bulk vehicle upload, and performance fixes via lazy-loaded routes, infinite-scroll pagination and AbortController cancellation.

Trueway — Smart Home IoT App

Native Android (Kotlin & Java) · Feature Development + Version Upgrade + Play Store Release

- Built BLE + Wi-Fi combo (dual-mode) pairing on the Thing Smart (Tuya) SDK — BLE scan, activator token exchange, MultiModeActivator provisioning — with full onboarding (in-app Wi-Fi scanner, step-by-step bottom sheet, retry, AP-mode hotspot fallback); upgraded the toolchain (Kotlin 1.4-1.8, AGP 4.1-8.0, Gradle 6.5-8.5, Java 8-17, targetSdk 34) with AGP 8 namespace migration, JCenter removal, Tuya-Thing Smart SDK migration, View Binding and Android 12+ runtime Bluetooth-permission fixes; published to Play Store (v2.2.3) with signed release builds, R8 minification, resource shrinking and ABI splits.

Skorelix — Odoo Business Dashboard

React Native · iOS Platform Owner + Social Login

- Cross-platform mobile application (iOS/Android) built with React Native, providing role-based access for Sales, Finance, Inventory, HR, and Management to live Odoo ERP data. Implemented modular architecture with reusable components, React Hooks, and Context API for state management; integrated REST APIs using Axios for authentication, dashboards, drill-down views, and user management; developed interactive charts for line trends, donut charts, and bar graphs; and implemented profile editing, password changes, and role-based dashboard filtering.

NEUROSPHERE **2023 Aug - 2024 Aug**

JESi — AI Agent Mobile App

React Native / Expo & React

Sole mobile developer on JESi (Expo/React Native), building a conversational AI agent over WebSocket with streaming responses parsed into options, JSON, and project lists, powering an 8-stage project-creation state machine that dynamically renders UI based on agent prompts. Also responsible for developing and integrating backend APIs using Node.js, handling REST API development, business logic, database interactions, and token-based authentication to support seamless communication between the mobile application and backend services.

EDUCATION

APJ Abdul Kalam Technological University - BTech Computer Science **2018 - 2022**

TECHNICAL SKILLS

React Native,Reactjs, Flutter, Android, Kotlin, JavaScript, TypeScript, Dart, Redux Toolkit, RTK Query, Node.js REST APIs, WebSocket, Firebase, Mappls, Turf.js, BLE, Wi-Fi Provisioning, Git, GitHub, Android Studio, Xcode, Expo, Google Play Console, App Store Connect, EAS Build. AI: LLM Applications, AI Agents, RAG, Prompt Engineering, Model Evaluation.
